TABLES III, IV & V.

These tables are not required for Calcutta and the Suburban Municipalities, as they deal with statistics which are contained in Tables I, II and VI.

TABLE VI.

Religions.

This table shows the distribution of the population by religions. Among the Muhammadans were found 671 males and 166 females who were Shias. The rest were Sunnis. Among the Jains, 1,470 males and 729 females were returned as belonging to the Svetambari Terapanthi sect and 836 males and 327 females to the Digambari sect.

TABLE VIII.

Education.

This table shows the extent of literacy amongst the total population and for each religion returned. The test of literacy adopted at the Census was the ability to both read and write a letter, people of whatever age, who could write a letter to a friend and read the answer to it being entered as literate, and those who could not as illiterate.

In order to distinguish between Indian Christians and other Christians such as Europeans, Armenians and Anglo-Indians, statistics of literacy and literacy in English, for these two classes, are given below :—

AGE.	INDIAN CHRISTIANS.						CHRISTIANS OTHER THAN INDIANS.

TABLE IX.

Education by selected Castes and Races.

In this table statistics are presented showing the numbers literate, able to read and write, and the numbers literate in English, among persons inhabitant of Calcutta and its suburbs and belonging to all the more important castes, tribes and races found. Tabulation was undertaken for all such castes, etc., as constituted one per mille of the Calcutta population in 1911, and for such other castes, etc., as constituted one per mille of the population of Bengal and are found in Calcutta. Figures have also been added for Chinese and Japanese.

TABLE X.

Language.

IN this table statistics are presented, showing the mother tongues of the inhabitants of Calcutta. Separate figures are given for the numbers speaking each language in Calcutta, in the suburbs in the 24-Parganas, and in Howrah, as well as the total figures for Calcutta with its suburbs. The languages of India, which have been placed first, are arranged according to the localities in which they are commonly spoken ; first the vernacular languages of Bengal, then those of neighbouring provinces, Burma, Assam and Bihar and Orissa, and then those of other parts of India. Asiatic languages foreign to India follow and finally European languages.

TABLE XI.

Birthplace.

This table contains statistics of birthplace for all persons enumerated in Calcutta and Suburbs. Separate figures are also given for Calcutta City, for the suburbs in the 24 Parganas and for Howrah. In an appendix statistics are given showing the age and occupation of immigrants from certain districts which supply the greatest proportion of Calcutta's population. The figures in this appendix are for Calcutta and its suburbs together.

TABLE XII.

Infirmities.

THIS table shows the distribution by age of persons suffering from insanity, persons both deaf and dumb, persons totally blind and persons suffering from leprosy. Separate figures are given for Calcutta City, for the Suburbs in the 24-Parganas and for Howrah. Persons suffering from more than one of these afflictions are shown under each. Consequently the “total afflicted” does not agree exactly with the total of those shown as afflicted with each infirmity. The following is an account of the persons suffering from more than one of these infirmities :—

	CALCUTTA.			SUBURBS IN THE 24-PARGANAS.			HOWRAH.

TABLE XIII.

Infirmities by selected castes, tribes and races.

CALCUTTA WITH SUBURBS.

THIS table presents statistics, for Calcutta and Suburbs together, of the number of persons suffering from the infirmities dealt with in the preceding table, who belong to certain castes, tribes and races. The castes for which separate tabulation was undertaken, are those which, in the Province as a whole, supply the greatest number of infirm persons, or castes in which the proportion of infirm is high. These castes are typical of every level of society. Separate figures have also been given for European and allied races and Anglo-Indians and for Saiyads, as typical of the better class section of the Muhammadan community.

TABLE XIII.

Castes, tribes or nationality.

In this table are presented statistics of the different castes, tribes, races and nationalities inhabiting (*a*) Calcutta with its suburbs, (*b*) Calcutta City alone, (*c*) the suburbs in the 24-Parganas and (*d*) Howrah. Separate figures have been given for all Indian castes and races, which are as numerous as one per mille of the total population. Nearly 250 different Hindu castes and Muhammadan sections, which were returned by small numbers, are included under "Others." Full details have been given of the race of Europeans as for Japanese and Chinese.

TABLE XIV.

**Civil condition by age for selected castes,
tribes and races.**

This table contains statistics for certain selected castes, tribes and races in Calcutta and its suburbs, corresponding to those given for the whole population in Table VII, with this difference that age-periods 5—12 and 12—15 have been substituted for the quinquennial periods 5—10 and 10—15.

Statistics have not been prepared for all the castes numerically the most important in Calcutta, but figures have been given for typical castes from each section of the community :—

Among the Hindus—

- for Brahmans, typical of the highest grade in Hindu society,
- for Baidyas, typical of the upper middle class (professional and ministerial),
- for Agarwalas, typical of the up-country trading classes,
- for Shahas, typical of the Bengali trading classes,
- for Jugis and Jogis, the weavers, typical of the industrial community ordinarily divorced from agricultural pursuits,
- for Chasi Kaibarttas (Mahisya), typical of the cultivating classes,
- for Jalia Kaibarttas (Adi-Kaibarttas), typical of the fishing castes,
- for Bauris, typical of the labouring classes,
- for Doms, typical of the lowest grade of Hindus, and
- for Baishnabs, followers of Vaishnavism, and
- for Brahmos.

Statistics have been given for the Saiyads, so that by comparison with figures in Table VII, the characteristics of the highest Muhammadan classes might be contrasted with those of the great bulk of the community. Statistics have also been given for Anglo-Indians and Indian Christians.

TABLE XV.**Christians by Sect and Race.**

THIS table corresponds with that for 1911, which bore number XVII. and shows the denominations to which Christians of all races in Calcutta and its suburbs belong. It shows also the numbers belonging to each denomination who were Europeans, Anglo-Indians and Indians.

Separate figures are given for --

Calcutta with suburbs.

Calcutta City.

The suburbs in the 24-Parganas and Howrah.

The utility of the figures is somewhat vitiated by the fact that in the case of 17 per cent. of the Christian population, instructions regarding the entry of religion in the schedules were ignored and "Christian" only entered, while in the case of another 5 per cent. the entry of "Christian Protestant" only was made.

Eighty-nine persons were returned as belonging to Minor Protestant denominations as below :—

DENOMINATIONS.	TOTAL.			EUROPEANS AND ALLIED RACES.		ANGLO-INDIANS.		INDIANS.	
	Total.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.

TABLE XVI.

Europeans, and Allied Races, and Anglo-Indians by Race and Age.

THIS table shows the distribution of Europeans, Armenians and Anglo-Indians by age, details being given for each Ward of Calcutta, the Fort, the Port and each Suburban Municipality. No Europeans were enumerated on the canals. The table corresponds with that which bore the number XVIII in the volume of tables of the Census of 1911, and is in the same form, but for a slight change in the age-periods. An abstract for Calcutta with its suburbs is given below :—

AGE.		TOTAL.			EUROPEANS AND ALLIED RACES.						ARMENIANS.			ANGLO-INDIANS.

and 4 females) of indefinite beliefs.

Table XVII.

Occupations.

This Table corresponds with that which appeared as Number XV, Part A, in the Census Statistics for 1911. The scheme of classification of occupations has been only very slightly varied from that used ten years ago, which was drawn up on the basis of the classification devised by M. Bertillon, first used in France and now generally accepted as a basis for schemes of this sort. The occupations are divided into the same four main classes and 12 subclasses as in 1911, except that Subclass XI—"Persons living principally on their income" has been transferred from Class C—"Public Administration and Liberal Arts" to Class D—"Miscellaneous," but no alteration of numbering is involved by the change. Two new orders have been inserted, 19 for "Transport by Air" under Subclass IV—Transport, and 43 for "Air Force" under Subclass VI—Public Force, but what was order 19 "Industries connected with refuse matter" has been placed with order 18, which is now "Other miscellaneous and undefined industries," and what was order 40 "Trade in refuse matter" has been placed with 41 "Trade of other sorts" so that the orders 1 to 17 and 20 to 39 and 44 to 54 and the numbers they bear have not been changed. An order 56 has been added at the end of the classification for "Other unclassified unproductive industries" separate from 55 "Beggars, vagrants and prostitutes." The groups and their numbering have been somewhat changed.

Figures are given for the total numbers supported by each occupation as well as separate figures for male workers, female workers and dependents in (a) Calcutta and Suburbs, (b) the City alone, (c) the Suburbs in 24-Parganas and (d) Howrah. Statistics are also given for the number of workers in each occupation who had subsidiary occupations in agriculture.

TABLE XVIII.

Subsidiary occupations of Agriculturists.

In the Census Schedules a return was made of the principal occupation of each worker and also of his most important subsidiary occupation, if any. This table gives statistics of the subsidiary occupations returned by persons in Calcutta and its suburbs whose principal occupations were those of rent receivers, rent payers and agricultural labourers.

(i) *Rent*

LOCALITY.	SUBSIDIARY									
	Total number of rent receivers (actual workers).		Total number of actual workers who returned subsidiary occupation.		Rent payers.		Money-lenders and grain dealers.		Traders in jute.	
	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.

TABLE XIX.

Agricultural occupations as subsidiary to certain others.

In the Census Schedules a return was made of the principal occupation of each worker and also of his most important subsidiary occupation if any. The statistics of persons, whose main occupation was agricultural and who returned a subsidiary occupation, have been given in the last table. In this table statistics are presented showing the number of persons principally employed in the more important industrial occupations and in the jute trade, who returned subsidiary occupation in agriculture or otherwise. The table is thus in some measure the converse table to Table XVIII.

TABLE XX.

Distribution, by religion, of workers and dependants in different occupations.

In this table the statistics for those who find support whether as actual workers or dependants in the several occupations, as classified in Table XVII, are given separately for persons adhering to the Hindu, Muhammadan, Christian and other religions. The figures refer to the inhabitants of Calcutta and its suburbs together.

TABLE XX.—DISTRIBUTION BY RELIGION OF WORKERS AND DEPENDANTS IN DIFFERENT OCCUPATIONS.

Group number.	OCCUPATION.	CALCUTTA WITH SUBURBS.				
		TOTAL NUMBER OF WORKERS AND DEPENDANTS.				
		Total.	Hindu.	Musلمان.	Christian.	Others.

TABLE XXI.

Occupation by selected castes, tribes and races.

In this table statistics are given to show to what extent persons belonging to certain castes with clearly defined traditional occupation, who live in Calcutta and its suburbs, have continued in those occupations, and to show also what occupations have been taken up by those who have given up the traditional occupations of their castes.

The tabulation of the statistics was undertaken for castes selected for the Province as a whole. The largest castes were not always selected, but castes were chosen from every grade of Hindu society and an endeavour was made so that each class of traditional occupation should be included. Statistics have been included to show the occupations of Anglo-Indians, Armenians and Europeans, and, among the Muhammadans, Saiyads, in order that by comparison with the statistics for the whole bulk of the Muhammadan community given in the preceding table, the characteristics of the distribution by occupation of a section, representative of the better classes among the community may be brought out.

TABLE XXI.—OCCUPATION OF SELECTED

Calcutta

TABLE XXII.

Industrial Statistics.

The statistics which appear in this table correspond to those of Table XV-E of 1911, but have been somewhat amplified. They were obtained not from the Census Schedules, but from a special Industrial Return which was required to be filled up by the managers of every concern which employed as many as ten persons. The corresponding limit in 1911 was 20, so that factories employing between 10 and 20 hands are now included, whereas they were excluded in 1911.

The statistics are given in 7 parts—

Part I shows the number of establishments engaged in each particular form of industry in Calcutta and its Suburbs together, classified according to the number of employees in each and according as mechanical power is employed or not, and the employees in each are divided into managers, supervising and technical staff, clerical staff, skilled workmen and unskilled labourers; Europeans and Anglo-Indians are shown separately from Indians; among the artisans and labourers females are shown separately from males; and among the unskilled children are shown separately from adults.

Part II gives the same statistics for the City and its Suburbs separately, but in this part factories are not classified according to size or according as mechanical power is used or not.

Part III shows the concerns of each industry classified according to the caste or race of the owners and managers. The statistics of these first three parts correspond to the statistics given in 1911 with the exception that factories with 10—20 employees are now included.

Part IV shows the caste or race and birthplace of skilled workmen classified according to their industry and the particular occupation in that industry which each follows. Males and females, and children under 14 and adults are separated. In each case the castes of the employees are placed in order according to the numbers belonging to each, and in an appendix is given a table showing for all industries together the numbers belonging to each caste who have found employment. For those born in Bengal they are separated into those born in the district in which the factory is situated, those born in contiguous districts and those born in other parts of the Province. Those born outside Bengal are classified according as they were born in North Bihar, South Bihar, on the Chota Nagpur plateau in the Province of Bihar and Orissa, in Orissa, in the United Provinces, in the Madras Presidency, in other parts of India or outside India. Such a classification, it is found, leaves only two per cent. of the total number of skilled workmen to be shown in the last two classes.

Part V gives similar statistics for the unskilled labourers employed in each industry.

Part VI gives details of the power employed in factories engaged in each industry. First appear the numbers of establishments (with the number of their engines and the total horse-power) in which steam-engines, oil-engines, water-power or gas-engines are used to drive the machinery directly; second, the number of establishments using electric power generated on the premises, classified according as the prime-movers are steam-engines, oil-engines or water-power (the number and horse-power of the prime-movers is given and the number and power of the dynamos in use in kilowatts) ; and third, the number of establishments using electricity supplied from outside with the number and horse-power of the motors installed.

Part VII gives the number of looms worked by power and by hand (with and without fly-shuttles separately) in use in textile establishments, in the City and Suburbs separately.
